## ABOUT CONTRALOAD

### Who is Contraload?

Contraload was founded in 2004 and has become one of those great zero to hero stories. Over the years Contraload has grown to become the expert and market leader in pooling of plastic load carriers in a B2B environment across Europe. In 2018 it is 130 employees strong with an asset pool over 3 million owned units.

### Where does Contraload offer a service?

The head office is in Aartselaar, a small town near Antwerp in Belgium. Contraload also has offices and service centers in the UK, France, Spain, Italy, Poland, Germany and Turkey to support 3.000 customers in over 15 countries. It's simply the biggest European network for plastic load carriers. For other parts of the world Contraload also has service options as we are able to offer specific services and products to parts of Asia, Africa, North- and South America.

### What services do we offer?

#### **WE POOL**

By getting more companies to use Contraload load carriers, we can reduce overall supply chain costs. Transport costs, investments, quality issues and the stress of managing load carriers are reduced. Pooling is a sustainable way to ship goods as sharing asset trips reduces carbon emissions, improves availability and meets the need for improved hygiene.

#### **WE RENT**

In addition to pooling we also offer short and long-term rental solutions with additional services such as pooling and cleaning where needed.. The big advantage of renting is that you invest in your core business and keep your CAPEX for the projects that add value to your product.

#### **WE SELL**

If pooling or renting is not an option...

We also have a webshop that shows a selection of products that have passed our quality standards and where we feel customers can rely on the product to perform in line with expectations. We can offer other alternatives to these products if you need an additional benchmark or if you require different sizes and tolerances.

**Get the right product and the right service at the right price!**

---

## What is Pooling?

Our full pooling service consists out of the following elements:

- Delivery of the agreed quantity at the agreed locations
- Rent of the quality load carriers for the time you use it
- Collection of the agreed quantity at the agreed locations
- Cleaning and inspection of the load carriers after every collection
- Replacement/Repair of broken parts or load carriers
- Tracking and tracing the load carriers pro-actively
- Regular audits to make sure losses can be prevented

Elements can be added or taken out to adapt our service to the customers needs.

## What products does Contraload pool?

For the most up-to-date list, please check our website.

Contraload has 4 product categories with a range of sizes:

Plastic pallets

Dry bulk containers

Liquid containers

Layer pads

We also have existing pooling services for products that were specifically tailored to our customer's needs and where Contraload has assisted in both design and production.

## Can Contraload track my load carriers?

Contraload wants to promote reuse of load carriers. We can supply tracking hardware and software to help you track your load carriers more efficiently and assist where necessary to enable you to have full control over your load carriers. Our assistance can vary from reporting to transport planning, to cleaning the load carriers or even helping you to finance your project.
